VICTOR SALGADO

FULL STACK & DATA DEVELOPER / END-TO-END SYSTEMS OWNERSHIP

Full Stack and Data-focused Developer centered on owning complete problem lifecycles: business diagnosis, system architecture, implementation, deployment, and operational stabilization. I work as a single accountable owner when needed, delivering reliable outcomes without requiring additional technical intermediaries. MERN-stack development with TypeScript, React, Next.js, Node.js, plus SQL-driven analysis for operational decisions in real business contexts.

Experience

Full Stack Developer

2024 – Present

vmDev Studio

- › Design and build full web applications end-to-end: UI, business logic, data modeling, API development, and deployment.
- › Own delivery from requirement definition to production support, including incident response and iterative hardening.
- › Portfolio work emphasizes maintainable, production-ready code and practical user-focused solutions.
- › Implementation of REST services, auth flows, and structured data management across multiple client projects.
- › Translate business questions into SQL-based analysis to support operational decisions and process improvements.
- › Remote collaboration with bilingual stakeholder communication and technical documentation.

Operations & Team Leadership

2012 – 2024

Bilingual Operations

- › 10+ years of bilingual operations and team leadership before transitioning full-time into software development.
- › Strengthened communication, ownership, documentation, and ability to work with non-technical stakeholders.
- › Directed technical and operational teams in client-facing bilingual environments.

Selected Projects

mindtrack-ai

Project management platform with semantic search, owned from architecture to usable production workflows.

TypeScript · React · Node.js

sentrylog

Real-time security monitoring dashboard delivered with end-to-end ownership of data flow, alerts, and operator usability.

React · Node.js · Express · PostgreSQL

FacturAutentico

CFDI 4.0 invoicing system for a real business, from process diagnosis to deployed operation and continuous improvement.

React · Vite · JavaScript

TriApp

Full stack app with auth, REST APIs, and 40+ deployments, managed end-to-end from implementation to release quality.

Node.js · Express · MongoDB · React

Education & Credentials

- Full Stack Developer — TripleTen LatAm
- Oracle Academy Data Analysis Learning Path (270h): Database Foundations, Database Design, Database Programming with SQL
- EF SET English Certificate — C2 Proficient
- IBM SkillsBuild — IT Fundamentals
- Lic. en Ciencias Financieras, Economía y Negocios Internacionales — Universidad de Morelia
